

K035 KNEE GUARD
0026740

0026740.070

0026740.030

0026740.090

FEATURES

The K035 knee brace provides impact protection and limits knee hyperextension. Lightweight yet durable, this protector features a honeycomb outer shell with an advanced design that uses hexagonal cell geometry to effectively distribute and absorb impact energy, achieving an optimal balance between light weight and strength. The outer shell, combined with the perforated inner lining material, ensures stability and ventilation.

The double-joint mechanism and semi-rigid plastic construction are designed to meet Level 2 certification, offering strength, comfort, and adaptability to knee movement while riding.

Additional removable padding, secured with Velcro, allows the knee pad to be perfectly adjusted to the rider's joint.

Highly breathable neoprene bands ensure proper positioning of the knee pad and provide excellent ventilation.

Elastic bands enable optimal tensioning, firmly securing the protection to the rider's joint. This adjustable system allows a custom fit based on comfort and safety preferences without compromising effectiveness.

Elastic socks, designed to be worn under the knee pad to prevent rubbing and irritation, are included with the product. Made of elastic material with a breathable back insert, they provide additional comfort and ventilation.

Certification: EN 1621-1/2012 HOMOLOGATED Knee Protection: Level 2

Features:

- Plastic knee protectors
- Breathability ensured by perforated honeycomb plastic, ventilated interior, and breathable neoprene bands
- Closure via neoprene bands with Velcro and tensioning with ventilated elastic bands
- Adjustable fit with elastic Velcro straps
- Removable inner padding for a customized fit

Weight: 0.830 kg / 1.98lbs

Sizes: one size fits all

SKAY
0024861

0024861.318

FEATURES

CONSTRUCTION AND DESIGN:
Durable fabric for impact and abrasion protection
Breathable materials for maximum comfort and lightness
Curved construction to perfectly follow the anatomy of the knee

Internal silicone to ensure maximum seal
Upper elastic band to ensure better adjustment
Padded material around vulnerable areas of the knee
BODY PROTECTIONS:
Homologated 1621-1:2012

PRODUCT DETAILS

TPE 32,00% | POLYESTER 28,00% | NYLON 15,00% | EVA 9,00% | SPANDEX 8,00% | SILICONE 3,00% | OTHERS 5,00%

SOFT RUSH PANTS
0024527

0024527.318

FEATURES

MANUFACTURING AND DESIGN:
Innovative multi-layer soft materials with high impact absorption: ventilation, protection, lightness and flexibility
On the upper thigh and part of the gluteal area, three layers of viscoelastic material fitted on elastic mesh extremely resistant to tears and wear, which guarantees: ventilation, protection, lightness
Protective EVA plates placed on the coccyx and lower lateral/front thigh
Biofoam padding for upper side hip protection
The innovative three-layer fabric design combines light weight/ventilation and ease of movement, facilitating heat exchange and breathability.

Elastic bands on thighs with silicone inserts
GLUTEUS PADDING:
The unisex style, is suitable for women and men, excellent for off-road cycling and motorcycling
Designed for off-road terrain with special high density inserts in the ischiatic area, specially positioned to optimize comfort and performance on all terrain
Quick-drying fabric guaranteeing excellent breathability during the most strenuous activities
BODY PROTECTION
CERTIFIED EN 17092-6:2020
EVA protective plate for coccyx protection
EVA plate side/frontal lower thigh
Biofoam padding for upper side hip protection

FEATURES

Kneecap, tibia, and lower part of the femur are constructed in a sandwich of thermoplastic material and a padding that allows high-energy shock absorption (P.O.I. TECHNOLOGY).
The system is double-articulated and adapts well to the anatomy of the knee. It ensures maximum movement with great torsional stiffness, combined with the attachment system which is made of 2 big neoprene bands.

TRANSPORT BAG AND ELASTIC SOCKS INCLUDED.
